Allowable Subject Matter

1. Claims 15-42 are allowed.
2. The following is a statement of reasons for the indication of allowable subject matter:

The present invention relates to method and apparatus for power controlling in the reversed channel. Particularly, prior art of record, taken individually or collectively, fails to fairly teach such method and apparatus, including "in response to the received power control bit, adjusting a transmission power level of both the traffic channel and the reverse control channel, wherein the power level of the traffic channel and the reverse control channel are separately adjusted", as claimed in independent claims 15, 21, 29 and 35 (claims 16-20, 22-28, 30-34 and 36-42 depend therefrom). Thus, claims 15-42 are found to be novel and unobvious over prior art of record.
